Annual Report for the Year 2021 – 22

We are living in an extraordinary times and the academic session 2021-22 was truly challenging in many ways since the beginning of the covid-19 pandemic. The year 2021 marked the completion of 27 years of excellence at Vidya Niketan Girls High School. Despite the situation being challenging in nature, all the stakeholders put in their dedication and commitment towards proper functioning of the school. The transition from physical classrooms to the online sessions was extremely challenging not just for the students and teachers but also for the parents who made it possible for the online education to students. The session 2021-22 marked the reopening of school after a very long duration of online education. We emphasized on creating a bridge education for the students who could not follow or faced difficulty during the online classes. We prioritized on physical activities and mental wellness of the students and teachers which was greatly impacted during the lockdown.

Grade X Results

We are pleased to announce that just like every year our students outperformed and have achieved 100% results in the CBSE Board examination. We congratulate to all our students for their wonderful performance in the Board examination. We are also indebted to all our staffs who really made it possible with their dedication, diligence and perseverance.

Co-curricular activities

During the course of the session many literary, cultural, art competitions were held at various levels to encourage and appreciate the talent of the students. In the field of literary we organized Debate, Elocution, essay writing, role play, book review, collage making and recitation competitions. It was emphasized to conduct the competition to choose the best in each house and the students to build a rapport of their house. Overall a healthy competitive spirit was inculcated among the students. At the start of the session the school was still going through the phase of lockdown and so during that time the competitions were held online and we received a lot of participations from the students. It was a learning experience not just for the students but also for the management as well to have organized it online.

Day, World humanitarian Day etc. The children did a splendid job of presenting their special assemblies which was also greatly supported by our faculty and staffs.

House Assemblies

The House assemblies were conducted online by the respective houses and the students who belonged to their respective houses. The assemblies were based on values and ethos that each house stands for. The participation of the students in the house assemblies was noteworthy.

Circle Time

Circle time is held every Saturday is a means to help children to build their emotional quotient and interact with the teachers in a non-threatening atmosphere. Various topics like anger, negativity, mental well-being etc were discussed in order to help the students cope with the stress and anxiety.

Science Day

Another very significant day that was celebrated is the Science Day, to boost the scientific temperament and logical thinking of the children. The theme for this year was "Science in Everyday life". Students showcased the science activities and experiments which was conducted under the supervision of the Science teachers.

DEAR Time

The importance of reading is reiterated through reading programmes. The last Friday of every month is allotted to DEAR time – 'Drop Everything and Read' which emphasizes on the importance of reading. The students also pledged to always consider "Books are their best friend".

Assessments

We are pleased to place on record that we have conducted the assessments for students as planned. PTMs were also conducted to discuss the academic performance of the child. Progress report cards were also provided to the parents and the class teachers discussed the performance of individual students with them.

Olympiads and External Competitions

Olympiads organized by the state and CBSE were conducted in English, Maths, Science and Computer and other extra-curricular activities. In the external competitions conducted, our students proved their mettle and bagged a number of accolades including gold and silver medals.

Independence Day

On the eve of Independence Day the tri colour was hoisted in the school by the Principal. Students from all grades presented various activities in the form of speech, elocution, dance and song. All their performances were coordinated and prepared by our teachers.

Teacher's Day

This is the day when the entire Vidya Niketan family looks forward to reward and appreciate the contributions of the teachers.

The students took the initiative and put up a special program as a token of respect and gratitude for the teachers. The Management applauded the work done by the teachers during and after pandemic.

Children's Day

Keeping in mind that the children were confined to their homes for such a long time, the teachers encouraged students to participate in the activities conducted on the eve of Children's Day. The teacher's took part in the event too dressing up in traditional north eastern attires. The children were provided complimentary snacks after their performance.

Conclusion

It is a matter of pride that many of our teacher's attended the rigorous training provided by the CBSE and Sahodaya. The school management always try to keep the teacher's updated with the syllabus and relevant skills. In addition a lot of in house training was imparted to the teacher's to learn the various teaching methodology required to develop the overall capability of the students. We are also working on the methods as suggested by the New Education Policy by the Government. By nurturing young minds and strengthening their values we strive to motivate our students to reach their true potential and thus make them worthy citizens of the country. With renewed enthusiasm and energy, we commit ourselves to the cause of education with the support of visionary management, distinguished and diligent faculty, motivated students and understanding parents. We are all set to move forward and scale greater heights in the years to come.
